

Whale Watch Report

Q2 2026 13F Holdings Analysis (positions as of June 30, 2026) | Generated: August 30, 2026

Executive Summary

This report compares the five tracked hedge fund managers' latest 13F filings (Q2 2026, all filed August 14, 2026; the next 13Fs arrive ~November 16) against your Fidelity portfolio snapshot dated July 31, 2026. This run parses the complete Point72 filing (all 3,923 line items) rather than top-25 aggregator views, so extended overlap via Cohen's granular multi-strategy book is now captured. Dominant whale themes remain: the memory/semiconductor supercycle (MU, TSM, SNDK), SpaceX's emergence as an institutional position at three of five whales, AI power and data-center energy infrastructure, and bitcoin miners pivoting to AI compute.

STZ	\$518	Point72 0.4%	Low - P72 small
VRT	\$229	Coatue 0.6%	Low - Coatue small
JNJ	\$1,550	(P72 holds PUT only - bearish hedge, not ownership)	No whale ownership

Note: Point72 options overlays (calls/puts) exist on nearly every name and are excluded from the ownership columns. Notable directional option signals from Cohen's book: MU put + call (hedge), SNDK put 0.2% (bearish hedge), TSLA put 0.2%, Tepper AAPL put 3.1% (notional-large hedge). JNJ was corrected vs the Aug 28 report: P72's JNJ line is a put, not common ownership.

Caution Flags

- AMD: Situational Awareness exited entirely; Point72 and Tepper both trimmed. You hold \$3,369. The whale consensus on AMD turned negative this quarter.
- SNDK concentration: Aschenbrenner's fund is 28% concentrated in Sandisk, but press coverage (24/7 Wall St., Aug 17) reported the position 'unraveled' sharply in early August. Your Roth is 21.6% SNDK - consider whether that single-name risk is intentional.
- SPCX: SpaceX only became 13F-visible this quarter (likely via a listing/tender event). All three whale stakes are brand new - no track record of how they will manage it. Your combined \$6,295 predates their entry.
- 13F lag: all data is as of June 30, 2026, filed August 14, 2026 - whales may have already rotated in July/August.
- P72 extended overlap is low-conviction by construction: Cohen's fund holds slices of thousands of names. Treat Point72-only overlaps (\$0.1-0.9% of fund) as weak signals; the 3+ whale names and SA/Tepper/Coatue/D1 concentration positions are the real signals.

Whale Themes Mapped to Your Portfolio

Theme	Whale Positions	Your Exposure
Memory / semis supercycle	MU, TSM, SNDK, STX, LRCX, AMAT, ASML	MU \$6.8K, STX \$6.3K, SNDK \$3.7K, TSM \$0.4K
SpaceX emergence	D1 61.9%, Coatue 6.5%, Tepper 0.5% (all NEW)	SPCX \$6.3K combined
AI power & energy infra	BE, VST, NRG, CEG, GEV, ETN, EQIX, NBIS	BE \$3.9K, CEG \$2.3K, GEV \$1.2K
BTC miners pivoting to AI compute	RIOT, CLSK, CORZ, APLD, HUT, IREN	CORZ \$7.1K, RIOT \$5.6K, HUT \$2.1K, APLD \$1.9K, CLSK \$1.9K
Internet platforms	AMZN, GOOGL, META, SPOT, APP	AMZN \$22.8K, GOOGL+GOOG \$5.2K, SPOT \$5.1K
Defensive/staples (P72)	PG, JNJ (put only), MDLZ, KDP	PG \$1.3K, JNJ \$1.5K

Changes vs Prior Run (Aug 28, 2026)

- Same data quarter (Q2 2026 13Fs are the latest until ~Nov 16); portfolio CSV unchanged (Jul 31 snapshot).
- Data completeness: this run parsed the full Point72 filing (3,923 rows), lifting overlap coverage from 26 to 40 tickers (extended, low-conviction P72 sleeves included).
- Correction: Point72's JNJ line is a PUT (bearish), previously reported as an added position. JNJ removed from ownership overlap. Similarly, SNDK put 0.2% at P72 is a hedge, while SA remains the SNDK bull (28%).
- No new 13F filings since Aug 14; no change to whale positions. Next refresh: Q3 2026 filings, ~November 16, 2026.

Methodology & Data Notes

- Sources: SEC Form 13F-HR filings (filed 2026-08-14, period 2026-06-30) for Point72 (CIK 1603466), D1 Capital (1747057), Appaloosa (1656456), Coatue (1135730), Situational Awareness (2045724). Holdings data via 13f.info per-filing JSON endpoints (full files, parsed programmatically).
- Ownership = common-stock rows only. Call/put rows are treated as options overlays and reported separately. Warrants noted as such (P72 CORZW).
- 13F limitations: long US-listed positions only; shorts, foreign listings, most private stakes, and cash are not disclosed. Positions are up to 45 days stale.
- Portfolio source: Fidelity Portfolio Positions export dated July 31, 2026 (accounts 653524180, 653524181, 42107). The 401k snapshot (account 42107) holds index/target-date funds with no whale overlap.
- NBIG (Themes 2x leverage ETF) is unrelated to SA's NBIS (Nebius) despite the similar ticker.
