

Truth-Based Trading Report ? 2026-07-16

Fact-based retirement strategy synthesizer. No narratives. Only base rates, fee math, and terminal wealth.

1. Portfolio Snapshot (Portfolio_Positions_Jul-09-2026.csv ? Latest Export)

Account	Value
42107	\$261,202.50
653524180	\$238,098.67
653524181	\$18,660.92
Grand Total	**\$517,962.09**

2. Evidence Base (SPIVA + Fee Mathematics + Valuation Context)

SPIVA 2024 Scorecard (US Equity)

Horizon	% of Active Funds Underperforming S&P 500
1 year	~60%
5 years	~80%
15 years	~90%
20 years	~95%

Base rate: Over any meaningful retirement horizon, actively picked equities are a coin-flip at best and a trap at worst.

Fee Drag Mathematics

A 2% annual fee on a 7% nominal return over 25 years destroys ~39% of terminal wealth.

Add a 20% performance fee and the drag extends to -45% to -55%.

Translation: You do not need to pick losers. High fees alone ensure you finish behind the index.

CAPE & Valuation Context (History Rhymes, latest available)

- CAPE = ~40?42x (2nd highest ever; first was dot-com peak 1999?2000)
- S&P 500 Forward P/E = ~21.0x (vs historical ~17x)
- Buffett Indicator = ~219% of GDP (2.1 standard deviations above average)
- 10-year forward real returns from CAPE > 35 average ~0?2%
- Base case: Volatile sideways-to-down grind, -10% to -20% drawdowns
- Bear case: -20% to -35% bear market (stagflation + earnings recession + credit unwind)
- Bull case: Earnings growth + AI productivity compresses CAPE via growth, not price

Conservative Real Return Assumptions (25-year)

Category	Real Return Assumption
FOUNDATION	4.0%

2026-07-16 truth based trading

MOATS	5.5%
SPECULATION	2.0%
NARRATIVE	0.0%

...

3. Position Classification

Rules:

- FOUNDATION: Broad index, bonds, target-date, gold, Treasuries, cash equivalents.
- MOATS: Durable competitive advantage, real cash flow, wide-moat businesses.
- SPECULATION: Crypto proxies, story stocks, binary outcomes, no earnings, thematic traps.
- NARRATIVE: Sector/thematic ETFs, active products, narratives adding noise without alpha.

Allocation Summary

Category	Value	% of Total

4. 25-Year Terminal Wealth Projection

Category	Current Value	25-Year Terminal
FOUNDATION	\$315,400.81	\$840,806.94
MOATS	\$39,843.04	\$151,937.14
SPECULATION	\$131,874.78	\$216,354.55
NARRATIVE	\$30,843.46	\$30,843.46
TOTAL	**\$517,962.09**	**\$1,239,942.10**

Sensitivity: What if SPECULATION earns -2% real?

That bucket becomes \$79,581.78. Total portfolio projects to \$1,103,169.32.

The difference between generous and punitive speculation outcomes is \$136,772.78.

Fee Drag Check

At 5% real portfolio return, a 2% annual fee destroys \$669,505.89 of terminal wealth over 25 years.

You do not need to pick bad stocks to lose. You only need to pay 2% per year.

5. Hard Truths

- 1. Most active management underperforms. SPIVA says so every year. A high speculation allocation bets against that base rate.
- 2. Excitement indexes.
- 4. The Roth is sacred. Tax-free growth should be in FOUNDATION + MOATS, not lottery tickets.
- 5. CAPE > 40 is not a buying signal. It is a warning. Diversification into bonds, gold, and international is arithmetic, not cowardice.
- 6. Hedge funds.
- 7. AI euphoria does not justify paying 21x forward earnings. Infrastructure booms historically produce poor forward returns for investors who buy at peak hype.
- 8. Watch breadth.

6. Recommendations (No Narrative, Just Math)

- 1. Raise FOUNDATION to 70-80% of total. Add low-cost total-market, international, and bond exposure.
- 2. Cut SPECULATION to <10%. Treat binary bets as hobby-size (?1% each).
- 3. Roth = FOUNDATION + MOATS only. Move speculation into VTI/VXUS/BND/GLDM.
- 4. Consolidate duplicates. GOOGL + GOOG = unnecessary. Pick one share class.
- 5. Re-read SPIVA before any new active position. If you cannot beat the 95% base-rate, do not buy it.
- 6. Re-read CAPE before increasing US equity exposure. New equity money should favor international/small-value/gold at this valuation.
- 7. Do not chase.
- 8. Watch breadth and VIX. Fewer than 4 sectors leading at new highs is a warning.

Report generated 2026-07-16 by automated Truth-Based Trading generator.
Evidence: SPIVA 2024, Bogle fee-mathematics, Hussman/GMO valuation models, History Rhymes framework.
Focus: wealth in 25 years, not excitement today.
