

THE ULTIMATE VICTORY

Executive Report

A 25-Year Master Plan for Dominant Wealth Creation
Through Ethical Value Creation

"Well done, good and faithful servant. You have been faithful over a little; I will set you over much. Enter into the joy of your master."

-- Matthew 25:23

May 12, 2026

Planning Horizon: 25 Years (2051)

Target: \$10M+ Portfolio

Core Principle: Create Value, Do Not Extract

Executive Summary

THE PARADIGM SHIFT: The goal is not survival against predators, but building systems so valuable that extraction becomes obsolete. Ethical value creation compounds faster than extraction because it builds trust, talent, and time horizon.

The Three Engines

1. COMPOUNDING CAPITAL: Deploy where value is created (70/20/10 allocation)
2. COMPOUNDING KNOWLEDGE: Build intelligence systems (2-5% annual alpha)
3. COMPOUNDING INFLUENCE: Create platforms that amplify impact (2-3% annual alpha)

25-Year Projection (Base Case)

Starting Capital: \$238,000 (May 2026)

Expected CAGR: 12% (blended across tiers)

2051 Portfolio Value: \$11,370,000

Annual Passive Income: \$455,000 - \$800,000

Immediate Priority

Deploy \$150K in Phase 1 over next 6 months:

- LAR (Lithium): \$25K -- Follow Northwestern Mutual \$108M position
- ZTS (Zoetis): \$15K -- Terry Smith quality compounder
- SGOL (Gold): \$20K -- Insurance/currency hedge
- VTI (Total Market): \$50K -- Broad economic capture
- BRK.B (Berkshire): \$15K -- Buffett capital allocation
- VXUS (International): \$25K -- Mean reversion play

The Philosophy

Why Value Creation Beats Extraction

EXTRACTION (The Enemy):

- Time Horizon: 1-3 years (quick exits)
- Trust: Burns bridges, transactional relationships
- Talent: Attracts mercenaries
- Regulation: Fights rules, plays in gray areas
- Sustainability: Depletes systems
- 25-Year Result: \$0-1M (if survive the blow-ups)

CREATION (Our Path):

- Time Horizon: 25+ years (generational compounding)
- Trust: Builds networks that amplify returns
- Talent: Attracts mission-driven builders
- Regulation: Shapes rules that favor value creation
- Sustainability: Regenerates systems
- 25-Year Result: \$10-25M (with lower risk)

The Math: Extraction = 100% of small pie, once. Creation = 10% of massive pie, compounding forever.

"What does it profit a man to gain the whole world and forfeit his soul?"

-- Mark 8:36

The Four Strategic Domains

Domain 1: Energy Transition (2026-2036)

THESIS: Decarbonization requires \$100+ trillion in infrastructure replacement over 30 years.

ALLOCATION: 25-30% of portfolio

KEY HOLDINGS: LAR (lithium), URA (uranium), BE (hydrogen), VST (nuclear)

EXPECTED RETURN: 15-25% CAGR over 10-year cycle

VALUE CREATED: Enable EV adoption, clean baseload power, industrial decarbonization

Domain 2: AI Infrastructure (2026-2032)

THESIS: AI requires physical infrastructure at massive scale. Hyperscalers spending \$200B+/year.

ALLOCATION: 15-20% of portfolio

KEY HOLDINGS: INTC (foundry), APLD (compute), VRT (cooling), copper/steel

EXPECTED RETURN: 12-20% CAGR

VALUE CREATED: Enable AI productivity gains, data center efficiency

NOTE: Avoid NVIDIA (valuation stretched), buy picks and shovels

Domain 3: Quality Compounders (Perpetual)

THESIS: Some businesses compound wealth for generations through pricing power and reinvestment.

ALLOCATION: 35-40% of portfolio

KEY HOLDINGS: BRK.B, ZTS, JNJ, KO, PG, V, MA, MSFT, GOOGL

EXPECTED RETURN: 12-15% CAGR forever

VALUE CREATED: Consistent returns, dividend growth, generational wealth

Domain 4: International Value (2026-2031)

THESIS: US overvaluation (CAPE 35+) vs international (15-20) creates mean reversion opportunity.

ALLOCATION: 15-20% of portfolio

KEY HOLDINGS: VXUS, VEA, VWO, Japan trading houses, India exposure

EXPECTED RETURN: Outperform US by 10-15% over 5 years

VALUE CREATED: Global economic development, diversification

The Tactical Edges

Edge 1: Smart Money Shadow (2-3% Alpha)

FOLLOW institutional accumulation, front-run the crowd.

CURRENT SIGNALS:

- Northwestern Mutual: \$108M LAR position
- Terry Smith: +1020% ZTS rotation
- Buffett: OXY, CVX accumulation
- Chris Hohn: 22% activist GE position

EXECUTION: Monitor 13F filings within 48 hours, build positions before institutions finish

Edge 2: Mean Reversion Timing (1-2% Alpha)

BUY quality on dips, TRIM momentum on peaks.

CURRENT OPPORTUNITIES:

- Semiconductors: MU +38% weekly = trim, not chase
- International: vs US stretched = overweight
- Value vs Growth: Energy vs Tech = maintain energy

Edge 3: Knowledge Compound (3-5% Alpha)

DEEP RESEARCH creates conviction, conviction enables holding through volatility.

CURRENT DEEP DIVES:

- Lithium supply chain: Argentina, Chile, Australia
- Nuclear regulatory path: SMR approval timeline
- Intel foundry economics: Break-even analysis
- AI infrastructure: Data center capex tracking

The Commitment

Lord of all creation,

Grant us the wisdom to see value where others see only price. Give us the patience to compound where others seek quick gains. Bless us with the courage to create where others only extract.

Let our wealth be a tool for Your purposes:

- Provision for our families*
- Multiplication for future generations*
- Distribution to those in need*
- Glory to Your name*

Protect us from greed, fear, and pride. Keep us humble in success and hopeful in setbacks. May we finish well, having run the race with integrity.

The victory is Yours. We are merely stewards.

In Jesus' name,

Amen.

**THE ULTIMATE VICTORY IS NOT SURVIVAL.
IT IS BUILDING SYSTEMS SO VALUABLE
THAT PREDATORS CANNOT COMPETE.**
