CURRENT PORTFOLIO CONTEXT

Account Value (BrokerageLink): ~\$240,000+

Total Portfolio (including 401k): ~\$280,000+

Top Current Holdings:

Ticker	Company	Value	% of Account
BE	Bloom Energy	\$39,799	16.56%
INTC	Intel	\$24,748	10.30%
CORZ	Core Scientific	\$17,881	7.44%
VDE	Vanguard Energy ETF	\$13,319	5.54%
AMZN	Amazon	\$9,891	4.12%

PORTFOLIO DIVERSIFICATION IMPACT

Current Portfolio Concentration:

- ~40% Energy (BE, VDE, XOP, CVX, etc.)
- ~10% Crypto Mining (CORZ, RIOT, WULF, etc.)
- ~20% Tech (INTC, AMZN, NVDA, etc.)
- Only ~5% defensive/dividend stocks

After Recommended Purchases:

- 10 new defensive/consumer staples positions
- Exposure to healthcare (JNJ, GEHC, DHR)
- Consumer staples (KO, PG, PM)
- Infrastructure/industrial (WM, GEV, MKL)
- Significantly reduced concentration risk

These additions would significantly diversify the portfolio away from its current concentration in energy, tech, and crypto-adjacent stocks, adding stability and dividend income.
