Daily Analysis of Hedge Fund Holdings

Portfolio Overlaps & Short Interest

Report Date: May 13, 2026

Data Coverage: Q1 2025 13F Filings

*Analyst: Spock*

## Executive Summary

This report analyzes holdings from top-tier hedge funds filing 13Fs for Q1 2025, identifies overlaps with current portfolio positions, and tracks short interest dynamics. The focus is on long-term conviction holds versus promotional short-term trades.

**Key Finding: Multiple top strategists showing accumulation patterns in select technology and energy names. Portfolio shows significant overlap with high-conviction energy plays validated by Warren Buffett's continued accumulation in Occidental Petroleum.**

### Key Highlights

- UBER: Multi-manager conviction (Ackman \$2.2B NEW + Tepper +113%)
- ZTS: Terry Smith quality rotation (+1020% position increase)
- GE: TCI activist accumulation (22% of portfolio)
- Portfolio Energy Overweight: 26% validated by Buffett
- BE: 14.22% of portfolio - No strategist support visible

## Section A: Long-Term Hold Recommendations

### High Conviction Overlaps

| Ticker | Manager  | Action  | Port Weight | Confidence |
|--------|----------|---------|-------------|------------|
| AMZN   | Multiple | Accum   | 3.53%       | HIGH       |
| NVDA   | Tiger/C  | Reduce  | 1.25%       | MEDIUM     |
| UBER   | Ack/Tep  | NEW/+   | Not Held    | HIGH       |

| INTC   | Tepper   | NEW     | 8.84%       | MEDIUM     |

### Portfolio Position Analysis

#### BE - Bloom Energy (14.22% = \$39,799)

- Status: No major strategist coverage
- Signal: Limited institutional support
- Verdict: ISOLATED POSITION - High risk
- Action: Monitor next quarter 13Fs

#### INTC - Intel (8.84% = \$24,747)

- Tepper (Appaloosa) NEW position Q1
- Mixed signals: Coatue reduced, Duquesne added
- Classification: TURNAROUND TRADE (not long-term)
- Tepper holds 6-18 months typical

#### Energy Complex (26.17% of portfolio)

- Buffett continues adding OXY
- Duquesne added EQT
- Classification: LONG-TERM SECTOR HOLD
- Buffett validation supports overweight

## Section B: Short Interest Analysis

### Current Portfolio Short Interest Exposure

| Ticker | Port Weight | Short Interest | Risk      |
|--------|-------------|----------------|-----------|
| BE     | 14.22%      | Unknown        | High      |
| INTC   | 8.84%       | Moderate       | OK        |
| RIOT   | 2.13%       | Very High      | Risky     |
| CORZ   | 6.39%       | Unknown        | High      |
| CLSK   | 0.90%       | 36.42%         | VERY HIGH |

### Market-Wide High Short Interest

| Ticker | Short % | Trend   | Setup      | Port Overlap |
|--------|---------|---------|------------|--------------|
| KSS    | ~54%    | Rising  | DISTRESS   | None         |
| WOLF   | ~45%    | Rising  | BANKRUPTCY | None         |
| CLSK   | 36.42%  | Rising  | CROWDED    | Yes (Roth)   |
| RIOT   | High    | Rising  | CROWDED    | Yes          |
| STAA   | 99.24%  | Extreme | DISTRESS   | None         |

### No Viable Short Squeeze Setups Currently

- KSS and WOLF have deteriorating fundamentals
- WOLF preparing bankruptcy filing
- High SI alone does not equal buy signal
- Need: Declining SI + insider buying + fundamentals

| META   | Alt/C    | Reduced | Mixed signals   |

## Section D: Strategy Playbook

### Active Strategies

#### 1. Multi-Manager Conviction Strategy

- Trigger: 2+ top managers increasing for 2+ quarters
- Confidence: HIGH | Hold: 12-24 months
- Current: UBER (Ackman + Tepper)
- Action: Consider initiating position

#### 2. Quality Compounder Sector Rotation

- Trigger: Terry Smith exits quality for new position
- Confidence: HIGH | Hold: 24-36 months
- Current: ZTS (+1020%, funded by PEP exit)
- Action: STRONG BUY - Research initiation

#### 3. Activist Industrial Turnaround

- Trigger: Hohn/TCI accumulates >15% portfolio
- Confidence: HIGH | Hold: 36-60 months
- Current: GE (22% of TCI portfolio)
- Action: BUY - 3-5 year thesis

#### 4. Buffett Energy Validation

- Trigger: Buffett adding energy (OXY)
- Confidence: HIGHEST | Hold: 5+ years
- Current: Portfolio overweight validated
- Action: HOLD - Allocation justified

### Failed Strategies (Learnings)

- Short Squeeze: High SI + bad fundamentals = trap
- ARKK Contrarian: Growth crash overwhelmed signal

## Section E: Portfolio Action Items

### Immediate Actions by Priority

#### Priority 1: Consider trimming BE

- 14.22% weight with no strategist support
- Highest concentration risk in portfolio
- No smart money validation visible

#### Priority 2: Monitor INTC closely

- Tepper entry positive but event-driven
- Watch Q2 13Fs for follow-through
- Mixed signals from other managers

#### Priority 3: Research UBER

- Multi-manager conviction rare signal
- Ackman \$2.2B + Tepper +113%
- Consider initiating position

#### Priority 4: Research ZTS

- Terry Smith quality rotation
- High probability setup historically
- Strong buy signal pattern

#### Priority 5: Research GE

- TCI activist accumulation
- 3-5 year value creation thesis
- Hohn does not engage lightly

### Risk Management

- Crypto exposure (~8%): High SI, consider consolidation
- BE: No institutional support - monitor closely
- INTC: Tepper validation but remain cautious
