

Top 100 Strategists Report — 2026-08-14

Portfolio overlap analysis with top hedge fund holdings. Focus: long-term conviction vs short-term trades, short interest context, and learned strategies.

A. Long-Term Hold Recommendations

Ticker	Portfolio Weight	Managers	Classification	Confidence
AMZN	9.44%	Appaloosa (David Tepper), Coatue (Philippe Laffont), D1 Capital (Daniel Sundheim), Point72 (Steven Cohen), SIT (Alexander Sacher)	LONG-TERM HOLD	HIGH
SPOT	2.12%	Coatue (Philippe Laffont), D1 Capital (Daniel Sundheim), Point72 (Steven Cohen), SIT (Alexander Sacher)	LONG-TERM HOLD	HIGH
GOOG	0.83%	Appaloosa (David Tepper), Coatue (Philippe Laffont), Point72 (Steven Cohen), SIT (Alexander Sacher)	LONG-TERM HOLD	HIGH
TSM	0.16%	Appaloosa (David Tepper), Coatue (Philippe Laffont), Point72 (Steven Cohen), SIT (Alexander Sacher)	LONG-TERM HOLD	HIGH
MU	2.83%	Appaloosa (David Tepper), Point72 (Steven Cohen), SIT (Alexander Sacher)	LONG-TERM HOLD	HIGH
TSLA	1.44%	Coatue (Philippe Laffont), Point72 (Steven Cohen), SIT (Alexander Sacher)	LONG-TERM HOLD	HIGH
CEG	0.94%	Coatue (Philippe Laffont), Point72 (Steven Cohen), SIT (Alexander Sacher)	LONG-TERM HOLD	HIGH
NFLX	0.91%	Coatue (Philippe Laffont), Point72 (Steven Cohen), SIT (Alexander Sacher)	LONG-TERM HOLD	HIGH
GEV	0.51%	Coatue (Philippe Laffont), Point72 (Steven Cohen), SIT (Alexander Sacher)	LONG-TERM HOLD	HIGH

Key Multi-Manager Conviction Themes:

- **AMZN** — 5-manager overlap including SIT (high tier). Largest portfolio weight (9.44%). Strong consensus.
- **SPOT** — 4-manager overlap incl. SIT. Recent acquisition of rights/restructuring continues to attract growth capital.
- **GOOG / TSM / MU / AMD** — AI/semiconductor infrastructure cluster. Multi-manager support but watch cyclicity.
- **CEG / GEV** — AI energy/infrastructure theme. Coatue + Point72 + SIT overlap = high-conviction energy transition.
- **NFLX** — 3 managers incl. SIT; durable streaming compounder with pricing power.

B. Short Interest Analysis

Direct short-interest data fetch was blocked by data providers (403/timeout). Using portfolio context and known short interest proxies for key positions:

Ticker	Context	Estimated SI	Flag
CLSK	Bitcoin miner, high volatility	Very High (>20%)	Crowded short; high squeeze risk if BTC rallies
CORZ	Bitcoin miner, restructuring story	Very High (>20%)	Crowded short; binary outcome
RIOT	Bitcoin miner	High (~15-25%)	Crypto beta short
WULF	Bitcoin miner	High	Same sector risk
HUT	Bitcoin miner	High	Same sector risk
CIFR	Bitcoin miner	High	Same sector risk
INTC	Turnaround / foundry narrative	Moderate (~3-5%)	Shorts betting against turnaround; Tepper exited
TSLA	High retail interest, valuation debates	Moderate-High (~5-20%)	Highly volatile; manager overlap but volatile
XYZ (Block)	Fintech / SMB ecosystem	Moderate	Point72 + SIT only; watch fundamentals
U (Unity)	Gaming/engine turnaround	Moderate-High	Point72 only; trade risk

Short Squeeze Candidates (high SI + possible catalyst):

- **CLSK / CORZ / RIOT / WULF / HUT:** If Bitcoin breaks higher or ETF flows accelerate, these names have material short interest and could squeeze rapidly. However, fundamentals remain commodity-linked and high-risk.
- **INTC:** If foundry separation/IP foundry wins materialize, a short-cover rally is possible. But Tepper exit reduces confidence.

C. New Money Flow & Manager Activity

Classification of all overlapping positions:

Portfolio Positions WITHOUT Strategist Support

Ticker	Portfolio Weight	Risk Note
FXAIX	8.78%	Index/ETF/bond/fund allocation (by design)
VDE	3.12%	Index/ETF/bond/fund allocation (by design)
RFHTX	2.78%	Index/ETF/bond/fund allocation (by design)
XOP	2.63%	Index/ETF/bond/fund allocation (by design)
SPCX	2.61%	High concentration, no top-manager overlap
VBND	2.05%	High concentration, no top-manager overlap

Notable exits / reversals from memory:

- **INTC**: Tepper (Appaloosa) exited in prior period. Remaining overlap is Point72 only. Classification: REVIEW / TRADE.

D. Strategy Playbook

Learned patterns from strategist-memory.md, updated with current data:

STRATEGY	TRIGGER	CONFIDENCE	HOLD TIME	RISK	CURRENT SETUP
Multi-Manager Conviction	On managers increasing same position	HIGH	2+ quarters	Low	AMZN, SPOT, GOOG, TSM, MU, C
Quality Compounder	Terry Smith/Fundsmith liquidates long	MEDIUM	6-12 months	Medium	No fresh signal; watch ZTS from me
Activist Industrial Turnaround	Chris Hohn/TCI >15% single industr	MEDIUM	2-4 years	Medium	GE/GEHC watch continues
Bitcoin Miner Squeeze	SI >20% + BTC breakout + declining	LOW-MEDIUM	3 months	High	CLSK, CORZ, RIOT, WULF, HUT
Avoid Hedge-Fund Hot	Single Point72 position in speculative	HIGH	NA	High	BE, APLD, TEM, RXRX, HTFL, VG

Recommended Actions:

- **HOLD / ACCUMULATE:** AMZN, SPOT, GOOG/GOOGL, CEG, GEV, NFLX on weakness. These have multi-manager overlap and fit the AI/infrastructure/quality theme.
- **REVIEW:** INTC — Tepper exit is a reversal signal; wait for new long-term manager sponsorship before adding.
- **MONITOR / TRIM:** Bitcoin miners (CLSK, CORZ, RIOT, WULF, HUT, CIPR) — high short interest and lack of multi-manager support make them trades, not long-term conviction holds.
- **NO ACTION:** Index ETFs, bonds, and gold trusts are by-design allocations; continue as planned.
- **WATCHLIST ADD:** ZTS (from memory) if quality rotation signal strengthens; GE/GEHC if activist industrial narrative returns.
