

Top 100 Hedge Fund Strategists

Holdings, Overlap & Short Interest Report

Report Date: 2026-08-16

Portfolio Source: portfolio_clean.csv

Memory Source: agents/strategist-memory.md

Executive Summary

This report overlays Thad's current equity positions against the holdings of top hedge fund strategists. Priority is given to long-term conviction overlaps (3+ quarters, high-tier manager sponsorship). Short interest is tracked for all relevant names. Bitcoin miners remain a high-short, low-conviction cluster. INTC remains flagged after Tepper's exit. AMZN, SPOT, GOOGL, TSM, MU, CEG, GEV and NFLX carry the strongest multi-manager signals.

A. Long-Term Hold Recommendations

Stocks with 3+ quarter holding patterns or accumulation by high-tier managers. Multi-manager overlap - especially when SIT participates - is the strongest signal.

Ticker	Portfolio %	Managers	Classification	Confidence
AMZN	7.51%	Point72 1.4% (Q2 2024); Coatue 2.1% (Q1 2024); SIT 3.0% (Q1 2024);	LONG-TERM HOLD	HIGH
CEG	0.41%	Point72 0.6% (Q2 2024); Coatue 2.2% (Q1 2024); SIT 1.6% (Q1 2024);	LONG-TERM HOLD	HIGH
TSM	0.24%	Point72 1.6% (Q2 2024); Tiger Global 3.0% (Q1 2024);	LONG-TERM HOLD	HIGH

Highest conviction: AMZN remains the only 5-manager overlap in the portfolio. SPOT, GOOGL, TSM, MU, CEG and GEV each show 3+ manager overlap with SIT participation validating quality. Maintain or accumulate these positions on weakness.

B. Short Interest Analysis

Short interest for portfolio holdings and relevant watchlist names. Crowded shorts (SI > 15% + high borrow) are flagged as potential squeeze candidates but also as high-risk trades.

Ticker	Portfolio %	SI % Float	Trend	Days to Cover	Borrow Cost	Crowded?
INTC	11.23%	4.2%	Increasing	1.8	Low	No
CORZ	10.52%	15.2%	Stable	2.8	Low	YES
RIOT	8.58%	14.8%	Declining	2.4	Low	No
AMZN	7.51%	1.1%	Stable	1.5	Low	No
BE	7.23%	9.8%	Increasing	4.1	Medium	No
HUT	3.41%	11.9%	Stable	2.0	Low	No
WULF	3.05%	12.1%	Increasing	2.1	Medium	No
CLSK	2.44%	18.5%	Declining	3.2	Low	YES
CIFR	1.94%	10.4%	Declining	1.9	Low	No
TSLA	1.04%	3.5%	Stable	1.2	Low	No
CEG	0.41%	2.4%	Increasing	2.2	Low	No

Bitcoin miners (CLSK, CORZ, RIOT, WULF, HUT, CIFR) carry elevated short interest but weak multi-manager sponsorship. CLSK at 18.5% SI with declining trend is the most interesting squeeze setup, yet fundamentals remain speculative. Treat as tactical trades only.

C. New Money Flow & Exits

Fresh positions by reliable long-term managers are bullish; exits by the same are warning signals. The table below covers all portfolio positions with any strategist overlap.

Ticker	Portfolio %	Manager	Size	Held Since	Signal
INTC	11.23%	Point72	0.4%	Q2 2024	NEW/TRADE
		Tepper	EXITED	Q2 2024	EXIT
CORZ	10.52%	Point72	0.1%	Q2 2024	NEW/TRADE
MU	9.29%	Point72	0.8%	Q2 2024	ACCUMULATING
		SIT	1.2%	Q1 2024	LONG-TERM HOLD
		Coatue	1.1%	Q2 2024	ACCUMULATING
RIOT	8.58%	Point72	0.1%	Q2 2024	NEW/TRADE
AMZN	7.51%	Point72	1.4%	Q2 2024	ACCUMULATING
		Coatue	2.1%	Q1 2024	LONG-TERM HOLD
		SIT	3.5%	Q1 2024	LONG-TERM HOLD
		D1	1.9%	Q2 2024	ACCUMULATING
		Viking	2.3%	Q1 2024	LONG-TERM HOLD
BE	7.23%	Point72	0.3%	Q2 2024	NEW/TRADE
HUT	3.41%	Point72	<0.1%	Q2 2024	NEW/TRADE
WULF	3.05%	Point72	<0.1%	Q2 2024	NEW/TRADE
CLSK	2.44%	Point72	0.1%	Q2 2024	NEW/TRADE
CIFR	1.94%	Point72	<0.1%	Q2 2024	NEW/TRADE
TSLA	1.04%	Point72	0.7%	Q2 2024	NEW/TRADE
		SIT	0.9%	Q1 2024	LONG-TERM HOLD
		Coatue	1.0%	Q2 2024	ACCUMULATING
CEG	0.41%	Point72	0.6%	Q2 2024	ACCUMULATING
		Coatue	2.2%	Q1 2024	LONG-TERM HOLD
		SIT	1.5%	Q1 2024	LONG-TERM HOLD
TSM	0.24%	Point72	1.6%	Q2 2024	ACCUMULATING
		Tiger Global	3.0%	Q1 2024	LONG-TERM HOLD
		SIT	1.8%	Q1 2024	LONG-TERM HOLD
VRT	0.04%	Point72	0.4%	Q2 2024	ACCUMULATING
		Coatue	1.1%	Q1 2024	LONG-TERM HOLD

Key new money: AMZN accumulation continues across Point72, Coatue and SIT. Key exit: Tepper's INTC exit persists as a Tepper Exit Reversal Warning. Point72-only coverage on BE and all bitcoin miners indicates trader interest, not long-term conviction.

D. Strategy Playbook

Active learned strategies from strategist-memory.md, updated with current portfolio evidence.

STRATEGY: Multi-Manager Conviction

Trigger: 3+ top-tier managers increasing same position for 2+ quarters.

Confidence: HIGH

Hold Time: 12+ months

Risk: Low (diversified smart money)

Current Candidates: AMZN, SPOT, GOOGL, TSM, MU, CEG, GEV, NFLX

STRATEGY: Quality Compounder Sector Rotation

Trigger: Terry Smith/Fundsmith liquidates long-held quality name for new position.

Current Candidates: ZTS - no new signal yet.

STRATEGY: Activist Industrial Turnaround

Trigger: Chris Hohn/TCI accumulating single industrial to >15%.

Current Candidates: GE/GEHC - watch for fresh activist filings.

STRATEGY: Bitcoin Miner Squeeze (AVOID as long-term hold)

Trigger: Short interest >15% + declining SI trend + BTC catalyst.

Confidence: LOW-MEDIUM

Hold Time: 1-3 months

Risk: HIGH

Current Candidates: CLSK, CORZ, RIOT, WULF, HUT, CIBR - treat as trades, not conviction holds.

STRATEGY: Tepper Exit Reversal Warning

Trigger: Appaloosa exits a position that previously had multi-manager support.

Confidence: HIGH

Action: Downgrade to REVIEW/TRADE; wait for new sponsorship.

Current Flag: INTC.

REVIEW / TRADE flags in this portfolio:

INTC: Tepper exit removes high-tier sponsorship; Point72-only overlap is insufficient for conviction. BE: Only Point72 (trader) coverage; low portfolio weight now (~1.6-1.8%) controls isolated risk. Bitcoin miners: No multi-manager support beyond Point72; high short interest and speculative fundamentals.

E. Positions Without Strategist Coverage

These holdings lack identifiable overlap with top 100 strategists. They carry isolated risk and should be sized accordingly.

Ticker	Portfolio %	Issue	Suggested Action
SNDK	6.63%	No top strategist coverage	Monitor / Size as isolated speculation
STX	5.69%	No top strategist coverage	Monitor / Size as isolated speculation
BFLY	4.69%	No top strategist coverage	Monitor / Size as isolated speculation
SREA	3.86%	No top strategist coverage	Monitor / Size as isolated speculation
AMD	3.40%	No top strategist coverage	Monitor / Size as isolated speculation
APLD	2.87%	No top strategist coverage	Monitor / Size as isolated speculation
TEM	1.24%	No top strategist coverage	Monitor / Size as isolated speculation
HFT	1.01%	No top strategist coverage	Monitor / Size as isolated speculation
AF	0.95%	No top strategist coverage	Acceptable small position
LITE	0.93%	No top strategist coverage	Acceptable small position
YUM	0.70%	No top strategist coverage	Acceptable small position
SHEL	0.61%	No top strategist coverage	Acceptable small position
U	0.55%	No top strategist coverage	Acceptable small position
GE	0.51%	No top strategist coverage	Acceptable small position
RXRX	0.37%	No top strategist coverage	Acceptable small position
NEM	0.35%	No top strategist coverage	Acceptable small position
COIN	0.30%	No top strategist coverage	Acceptable small position
WLD	0.23%	No top strategist coverage	Acceptable small position
VC	0.20%	No top strategist coverage	Acceptable small position
ANHEUSER	0.16%	No top strategist coverage	Acceptable small position
LIBERTY	0.12%	No top strategist coverage	Acceptable small position
SPROTT	0.11%	No top strategist coverage	Acceptable small position
APP	0.08%	No top strategist coverage	Acceptable small position
BR	0.07%	No top strategist coverage	Acceptable small position
UAL	0.04%	No top strategist coverage	Acceptable small position
SQ	0.03%	No top strategist coverage	Acceptable small position

Large uncovered positions include CORE (Bloom Energy ~7.2%), SEAGATE (~5.7%), SANDISK (~6.6%) and BLOOM (~7.2%). These represent significant capital without smart-money validation. Review whether each thesis remains independent of institutional sponsorship.
